Signing into the Chrome Browser on a PC or Mac

You must go through these steps the first time to ensure that personal bookmarks, extensions and passwords are not attached to student logins.
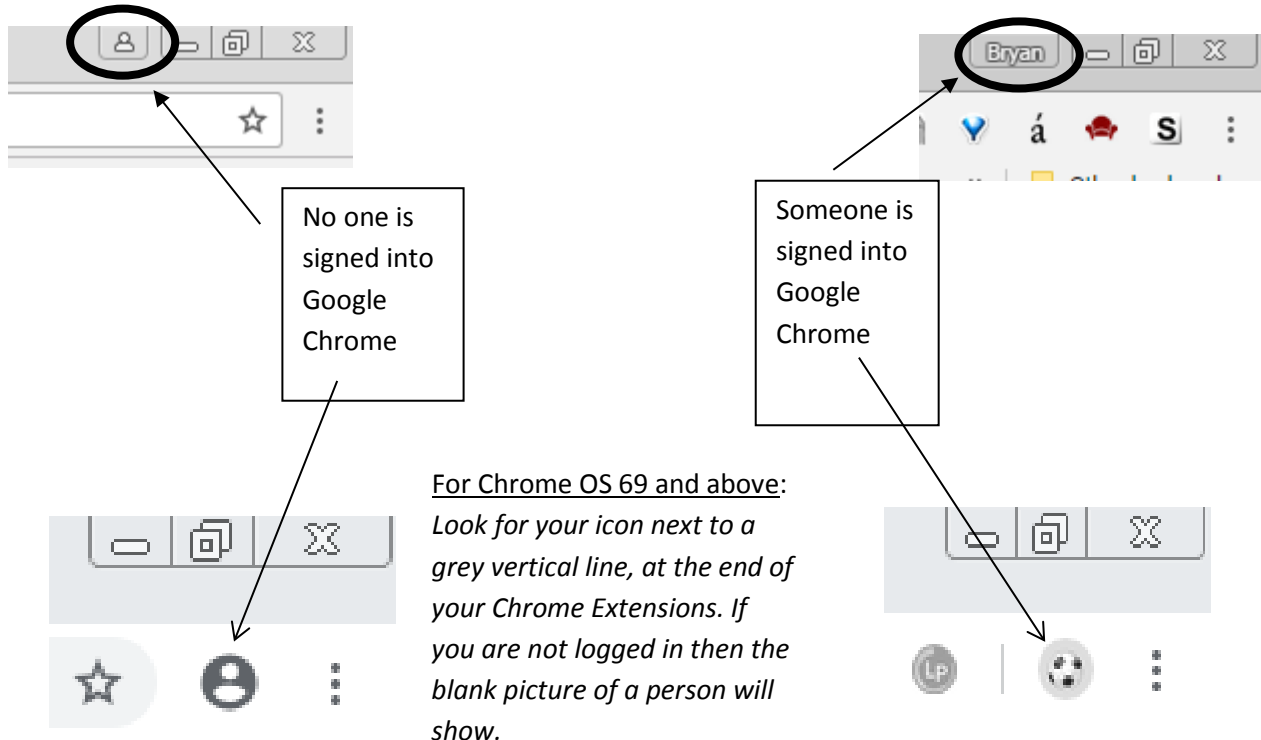

Why we have students sign into Chrome:

- The simsburyschools.net bookmark folder gives them access to district subscriptions like Discovery Education.

- Simsbury School's Chrome extensions like Read and Write for Google will be accessible.

***Steps to ensure proper signing into Chrome by student:***

Determine if you are signed in or not before signing your student into Chrome.
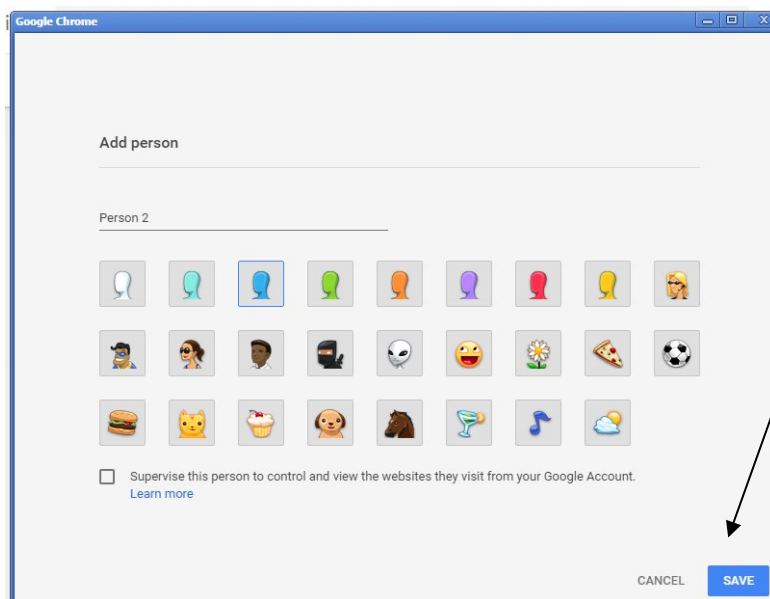

For Chrome OS 68 and below:

Look for your username on top of the Chrome Browser. It will say your name or nickname if you are logged in. If it shows a blank picture of a person, it means that you are not.

No one is signed into Google Chrome

Someone is signed into Google Chrome

For Chrome OS 69 and above:
Look for your icon next to a grey vertical line, at the end of your Chrome Extensions. If you are not logged in then the blank picture of a person will show.

a. If you are signed in or not, the procedure is the same. Click on the image of the person, the picture icon or your name and choose 'Manage people'.

☐ Choose what to sync
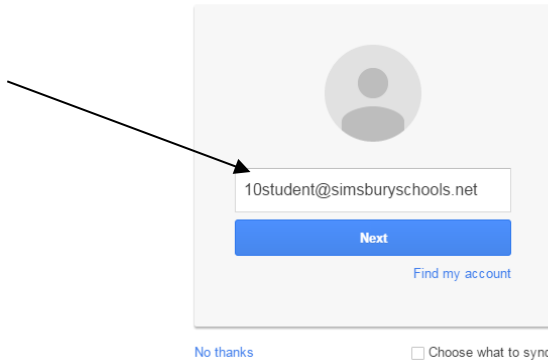

d. They will then be prompted to sign into Chrome, where they should use their @simsburyschools.net username and password.

e. After the student has signed in on this new profile they can 'Link data' so they receive all of the benefits of Chrome. None of your user data will be linked if you have followed the above steps.

Link your Chrome data to this account?   ✕

This account is managed by **simsburyschools.net**

You are signing in with a managed account and giving its administrator control over your Google Chrome profile. Your Chrome data, such as your apps, bookmarks, history, passwords, and other settings will become permanently tied to bmarchinkoski@simsburyschools.net. You will be able to delete this data via the Google Accounts Dashboard, but you will not be able to associate this data with another account. Learn more

f. Now that you have your student signed in as a separate 'Person', you can now switch back and forth easily between users. Click the name or picture icon on the top of your Chrome browser. Switch to the user you would like by clicking on a different name.
